Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application. Please amend the claims as follows.

Listing of Claims:

1. (Currently Amended) A method for sending a pre-selected portion of a document to a recipient via electronic mail comprising the steps of:

receiving a pre-selected portion of a document from a first application;

receiving a command to send the pre-selected portion of the document to a recipient via electronic mail;

in response to receiving the command to send the pre-selected portion of the document, coding the pre-selected portion of the document for transmission via electronic mail;

launching an electronic mail application program, and

inserting the coded pre-selected portion of the document into an e-mail message; detecting a command to apply an interactive control to the pre-selected portion of the document;

in response to receiving a command to apply an interactive control to the pre-selected portion,

coding an interactive control for the pre-selected portion, and

inserting the coded interactive control into the e-mail message with the coded preselected portion of the document so that the recipient can apply the interactive control to the preselected portion without opening said first application; and

sending the coded pre-selected portion of the document and the interactive control to the recipient via electronic mail.

2. (Original) The method of Claim 1, further comprising the steps of: determining content in the pre-selected portion of the document; and in response to determining the content,

changing a user interface to correspond with the content.

3. (Original) The method of Claim 1, wherein coding the pre-selected portion of the document comprises coding the pre-selected portion into HTML.

4. (Canceled)

- 5. (Original) The method of Claim 2, wherein the command to send the preselected portion to a recipient via electronic mail is received through the user interface.
- 6. (Original) The method of Claim 2, wherein the user interface comprises a send button that corresponds to content of the pre-selected portion of the document and changes in response to the content of the pre-selected portion.
- 7. (Original) The method of Claim 1, wherein the pre-selected portion of the document comprises a data range comprising a single cell or multiple cells.
- 8. (Original) The method of Claim 1, wherein the pre-selected portion of the document comprises a table or pivot table.
- 9. (Original) The method of Claim 1, wherein the pre-selected portion of the document comprises a chart or pivot chart.
- 10. (Original) The method of Claim 1, wherein the pre-selected portion of the document comprises a graphic or other object.
- 11. (Original) The method of Claim 1, wherein the document comprises a spreadsheet document or file.
- 12. (Original) The method of Claim 1, wherein the document comprises a word processing document or file.

13. (Canceled)

14. (Canceled)

- 15. (Previously Amended) The method of Claim 1, wherein the interactive control comprises an ActiveX control.
- 16. (Previously Amended) The method of Claim 1, wherein the interactive control comprises information to enable the recipient viewing the content of the pre-selected portion to manipulate the content.
- 17. (Previously Amended) The computer-readable medium of Claim 1, wherein the interactive control provides functionality for filtering, sorting, calculating, pivoting, and charting.
- 18. (Previously Amended) The method of Claim 1, wherein the interactive control comprises a spreadsheet application program function.
- 19. (Currently Amended) A computer system comprising a processing unit, a user input device coupled to the processing unit, a memory coupled to the processing unit, a display device coupled to the processing unit, and an application program running on the processing unit, for sending a pre-selected portion of a document to a recipient via electronic mail, operable to perform the steps:

receiving a pre-selected portion of a document from a first application;

receiving a command to send the pre-selected portion of the document to a recipient via electronic mail;

in response to receiving the command to send the pre-selected portion of the document, coding the pre-selected portion of the document for transmission via electronic mail,

launching an electronic mail application program, and inserting the coded pre-selected portion of the document into an e-mail message;

detecting a command to apply an interactive control to the pre-selected portion of the document;

in response to receiving a command to apply an interactive control to the pre-selected portion,

coding an interactive control for the pre-selected portion, and

inserting the coded interactive control into the e-mail message with the coded preselected portion of the document so that the recipient can apply the interactive control to the preselected portion without opening said first application; and

sending the coded pre-selected portion of the document and the interactive control to the recipient via electronic mail.

20. (Original) The computer system of Claim 19, further comprising the steps: determining content in the pre-selected portion of the document; and in response to determining the content,

changing a user interface to correspond with the content.

- 21. (Original) The computer system of Claim 19, wherein the step of coding the pre-selected portion of the document comprises coding the pre-selected portion into HTML.
 - 22. (Canceled)
- 23. (Original) The computer system of Claim 20, wherein the command to send the pre-selected portion to a recipient via electronic mail is received through the user interface.
- 24. (Original) The computer system of Claim 20, wherein the user interface comprises a dynamic send button that corresponds to content of the pre-selected portion of the document and changes in response to the content of the pre-selected portion.
- 25. (Original) The computer system of Claim 19, wherein the pre-selected portion of the document comprises a data range comprising a single cell or multiple cells.

Application No. 09/595,741

- 26. (Original) The computer system of Claim 19, wherein the pre-selected portion of the document comprises a table or pivot table.
- 27. (Original) The computer system of Claim 19, wherein the pre-selected portion of the document comprises a chart or pivot chart.
- 28. (Original) The computer system of Claim 19, wherein the pre-selected portion of the document comprises a graphic or other object.
- 29. (Original) The computer system of Claim 19, wherein the document comprises a spreadsheet document or file.
- 30. (Original) The computer system of Claim 19, wherein the document comprises a word processing document or file.
 - 31. (Canceled)
 - 32. (Canceled)
- 33. (Previously Presented) The computer system of Claim 19, wherein the interactive control comprises an ActiveX control.
- 34. (Previously Presented) The computer system of Claim 19, wherein the interactive control comprises information to enable a recipient viewing the content of the preselected portion to manipulate the content.
- 35. (Previously Presented) The computer system of Claim 19, wherein the interactive control comprises filtering, sorting, calculating, pivoting, and charting functions.
- 36. (Previously Presented) The computer system of Claim 19, wherein the interactive control comprises a spreadsheet application program function.

37. (Currently amended) A computer-readable medium with instructions for automatically sending a pre-selected portion of a spreadsheet document to a recipient, having computer-executable instructions comprising:

receiving a pre-selected portion of a document from a first application; determining content in the pre-selected portion of the document; in response to determining the content,

changing a user interface to correspond with the content;

receiving a command through the user interface to send the pre-selected portion of the document to a recipient via electronic mail;

in response to receiving the command to send the pre-selected portion of the document, coding the pre-selected portion of the document for transmission via electronic mail,

launching an electronic mail application program, and

inserting the coded pre-selected portion of the document into an e-mail message; detecting a command to apply an interactive control to the pre-selected portion of the document;

in response to receiving a command to apply an interactive control to the pre-selected portion,

coding an interactive control for the pre-selected portion, and

inserting the coded interactive control into the e-mail message with the coded preselected portion of the document so that the recipient can apply the interactive control to the preselected portion without opening said first application; and

sending the coded pre-selected portion of the document and the interactive control to the recipient via electronic mail.

38. (Original) The computer-readable medium of Claim 37, wherein the preselected portion of the document is coded into HTML.

- 39. (Original) The computer-readable medium of Claim 37, wherein the user interface comprises a send button that corresponds to content of the pre-selected portion of the document and changes in response to the content of the pre-selected portion.
- 40. (Original) The computer-readable medium of Claim 37, wherein the preselected portion of the document comprises a data range comprising a single cell or multiple cells.
- 41. (Original) The computer-readable medium of Claim 37, wherein the preselected portion of the document comprises a table or pivot table.
- 42. (Original) The computer-readable medium of Claim 37, wherein the preselected portion of the document comprises a chart or pivot chart.
- 43. (Original) The computer-readable medium of claim 37, wherein the preselected portion of the document comprises a graphic or other object.
- 44. (Original) The computer-readable medium of Claim 37, wherein the document comprises a spreadsheet document or file.
- 45. (Original) The computer-readable medium of Claim 37, wherein the document comprises a word processing document or file.
- 46. (Original) The computer-readable medium of Claim 37, wherein the interactive control comprises an ActiveX control.
- 47. (Original) The computer-readable medium of Claim 37, wherein the interactive control comprises information to enable a recipient viewing the content of the preselected portion to manipulate the content.

Application No. 09/595,741

- 48. (Original) The computer-readable medium of Claim 37, wherein the interactive control comprises filtering, sorting, calculating, pivoting, and charting functions.
- 49. (Original) The computer-readable medium of Claim 37, wherein the interactive control comprises a spreadsheet application program function.
